JES

Natural grace and imposing solidity in perfect synthesis: **JES** is a new milestone in the history of design. The range's flowing, organic forms are inspired by the shape of the aloe vera plant, combining aesthetic softness with a unique, strikingly contemporary sculptural presence.

ARTEFAKT

Artefakt Industriekultur was founded in 1989 and has received numerous prestigious international awards. In cooperation with the international industry, the design team develops product lines within the overall development process.

CUBIC

Quintessential and absolute: **CUBIC** creates a bold, powerful aesthetic that owes its impact to the basic principles of form. With this collection, **Friis & Moltke Design** – a defining force in Danish architecture – has developed designs that display the essence of cubism. Design without compromise.

FRIIS & MOLTKE DESIGN

Friis & Moltke Design is one of the mainsprings of Danish architecture. In 1996, the design agency emerged from the architecture firm established by the founders in 1955.

NEON

NEON is cylindrical and angular. It represents the symmetrical synthesis of two basic geometries, created for people who find that function and emotion can go hand in hand. **NEON** has no trendy airs and, thanks to its classic form, embodies minimalism and sensuality.

ARTEFAKT

NEON was designed by the Darmstadt-based studio ARTEFAKT Industriekultur founded in 1989. Together with their team, designers Achim Pohl and Tomas Fiegl develop top-quality product lines that have received numerous international awards. The creative duo's creed "reduce to identity" underscores their design methodology that focuses on reduction and concentration on the essential. The outcome: products with a distinctive identity in a world rich in diversity.

LIGHTHOUSE

Light, water and timeless flair. **LIGHTHOUSE** embraces its namesake's unconditional principle of form and transforms it into an aesthetic beacon for the bath. Outstanding elegance that lights the way.

A close-up photograph of a single-lever basin mixer faucet. The faucet is made of polished chrome and features a tall, cylindrical body with a decorative top cap. The handle is a single lever with a curved, flared end. The spout is curved and has a decorative, flared tip. The faucet is mounted on a white ceramic sink, which is set on a dark wood countertop. In the background, there is a vase with dried branches and a window with light coming through.

Fitting Finishes

JADO offers the ULTRA | FINISH exclusive conditioning procedure, making surfaces more scratch resistant, more colour fast, ultra hardwearing and more resistant to corrosion. The molecular fusion of metal and gas ions creates an extremely hard surface, providing an extra-long service life. The following surfaces feature this conditioning: Gold (23 carat) (A4), Ultra Brass (A9), Ultra Steel (GN) and Diamond Finish (XO).

Yet more individuality and freedom of expression: JADO fittings are available in a variety of surface finishes. Here are some examples.

Name syntax

All JADO products come with a seven digit product ID. The initial letter in combination with the four following digits constitute the article number while the final two letters define the surface finish.

Prod.ID	Finish	
H2369	AA	Chrome
H2369	A9	Ultra Brass
H2369	F2	Chrome / Ultra Brass

Furthermore, almost all JADO fittings are available in the surfaces Aranja (AF) and Old Bronze (XM). On request, each JADO fitting can be supplied with almost all available surfaces. Please contact us for details. Note: For technical reasons associated with printing, there may be slight variations in colour from the original.
